

KOMAINU

Job Description

| | |
|--------------------|---------------------------------------|
| Job Title: | Custody Operations Analyst |
| Reports To: | Custody Operations Manager |
| Location: | Jersey, right to work applicants only |

About the Company:

Komainu is the first regulated digital asset custody solution built by institutions for institutions.

Komainu was established as a Joint Venture between Nomura, Ledger and Coinshares to fill a gap in the marketplace and provide regulated entities with a secure and compliant custody service for investment in digital assets. Since then, the trend of financial services firms adopting digital assets has only accelerated, further increasing the need for regulated and institutional-grade infrastructure for digital assets.

To support the rapid growth of the company and to accelerate the institutional adoption of digital assets, Komainu is actively seeking to onboard best-in-class talent globally.

Role Summary:

The Custody team is responsible for managing the digital custody services offering which comprises of transaction processing, monitoring, reporting and operations risk reporting. In the initial stages a high degree of project support and business analysis will be required. As part of an agile team the postholder will be expected to be flexible and to assist across the wider regulatory, legal affairs and cyber-security as directed by his reporting line.

The postholder will work within the Custody team to ensure that Komainu fulfils its obligations both to its clients and its regulator. The postholder will be responsible for ensuring the timely and accurate submission/review of each transaction. There is also a requirement to centrally coordinate, manage and control this process to ensure outstanding exceptions are addressed on a daily basis.

KOMAINU
