

# KOMAINU

## Job Description

<b>Job Title:</b>	Junior Data Analyst
<b>Reports To:</b>	Senior Data Analyst
<b>Location:</b>	London, right to work applicants only

### About the Company:

Komainu is the first regulated digital asset custody solution built by institutions for institutions.

Komainu was established as a Joint Venture between Nomura, Ledger and Coinshares to fill a gap in the marketplace and provide regulated entities with a secure and compliant custody service for investment in digital assets. Since then, the trend of financial services firms adopting digital assets has only accelerated, further increasing the need for regulated and institutional-grade infrastructure for digital assets.

To support the rapid growth of the company and to accelerate the institutional adoption of digital assets, Komainu is actively seeking to onboard best-in-class talent globally.

### Role Summary:

Komainu is looking to recruit a self-motivated Junior Data Analyst to work closely with the Senior Data Analyst to support the business by:

- Gathering and validating Big Data
- Documenting data systems and processes
- Assisting in change management and implementation of data related projects
- Performing research and develop a sound knowledge of the business domain
- BAU Management Information (MI) to support decision-making
